

Improve area by pontoon
We need your views

We are seeking feedback from the community about a proposal to enhance the area adjacent to the pontoon at Burton Ferry ... to maintain it as a community asset.

It is well used. It is a community focal point. It is welcoming to visitors and brings local people together.

Main features of proposal

Cobbles:

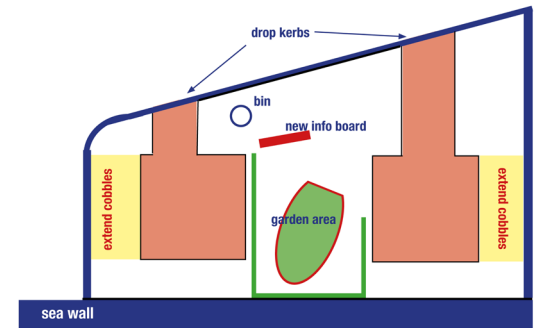

- drop kerb height for easier wheel chair access;
- tidy up cobbles and where needed re-lay;
- extend cobble area [yellow] to improve wheel chair access to tables.

Information board:

- replace rotting wood - with metal frame and mount info plaque on slate. [This will make it more durable to weather]

Benches:

- replace with recycled plastic benches that are durable to the weather and will need less maintenance;
- choose "walk through" design to make benches more accessible for those with mobility issues;
- choose design with extended table top to enable those in wheel chairs to use the table.
- [Existing benches, if sound, to go to Houghton Playing Field]

Location 

We need your views.

We also need your support to make a case for an 'Enhancing Pembrokeshire' grant so let us know if you think it is a good idea.
